Magnolia numerico 2007

Nr.			
1	acuminata		
2	acuminata	Georg Henry Kern	(Botanic Garden Karlsruhe) (acuminata Fertile Myrtle x denudata Sawada`s Cream) Neatly shaped tree with deep yellow, truly precocious flowers.
3	acuminata	Butterflies	Ten to fourteen tepals, stamens red.
4	acuminata	DC 4	Larger darker yellow than Elizabeth
5	acuminata	Elizabeth	Large clear primrose-yellow flowers. AGM
6	acuminata	Fertile Myrtle	a neat, narrow grower selected by Phil Savage. (subcordata Miss Honeybee x denudata Sawada`s Cream) Very early light yellow flowers. Tall and graceful, single trunk habit.
7	acuminata	Goldfinch	(acuminata Miss Honeybee x stellata Rubra) a deciduous , densely branched ,symmetrical shrub with star shaped, yellow flowers and bronzy new growth.
8	acuminata	Goldstar	(Woodsman x Sundance), very deep yellow, late flowering, upright growth
9	acuminata	Golden Crown	similar to Woodsman, but differs from that cultivar by having a light yellow color throughout the flower with the exception of a light purple streak on the back sides of each tepal. It is very hardy.
10	x brooklynensis	Golden Girl	a fine, free flowering, upright growing clone with bright golden yellow flowers
11	acuminata	Golden Glow	This vigorous hybrid has very deep yellow flowers of good size.
12	acuminata	Golden Glow x Miss Honeybee	(Magnolia x brooklynensis 'Eva Maria' x Magnolia x brooklynensis 'BBC#209') a hybrid with tulip like, bright yellow blooms having a magenta-purple basal flush and stripe on the tepal backs.
13	x brooklynensis	Hattie Carthan	
14	acuminata	Koban Dori	(Golden Plate Bird) (Nakamura, Japan)
15	acuminata	Large Yellow	Remarkable large yellow flowers
16	acuminata	Laser	16-ploid, colchicine treated (Kehr)
17	acuminata	Moegi Dori	(Yellow Green Bird) (Nakamura) Very hardy and late flowering hybrids. The flowers are small and yellowish green in color.
18	acuminata	Patriot	Blue Eternity (Nakamura)
19	acuminata	Seiju	(acuminata x denudata). Creamy yellow blooms, rather flat flowers. It is one of the largest flowered yellows available. Very Hardy.
20	acuminata	Sundance	(acuminata x brooklynensis Evamaria). Large deep yellow flowers, a good tulip-shaped form. It blooms at an early age.
21	acuminata	Yellow Bird	Large fragrant light yellow flowers with a light pink flush on the outside of the tepals. The yellow colour of the flowers fades to a creamy yellow after opening if the weather is warm. Flowers appear before the foliage. A large fast-growing tree.
22	acuminata	Yellow Fever	(subcordata x soulangiana Alexandrina) Large lemon yellow flowers, tulip-shaped and very long lasting. Very fertile and good breeder.
23	acuminata	Yellow Lantern	
24	acuminata	x Picture	
25	acuminata	x Sargentiana robusta	Very vigorous and handsome
26	acuminata F.M. acuminata var.	x Sprengerii Diva	pink flowers with leaves
27	subcordata acuminata var.	Ellen	Beautifully variegated leaves
28	subcordata	Miss Honeybee	a vigorous clone produces large, fragrant flowers that are bright yellow .

29 acuminata	Carlos(var.Subcordata x Heptepeta)	Large yellow-green flowers NA 60703 SAS R (SAT 88076)(Univ. Botanical garden, Vancouver, BC, Canada) Original scions collected in 1988 in Huangshan, China
30 amoena		
31 salicifolia	Horstmann no biondi	
32 x brooklynensis acuminata x		(acuminata x liliiflora) this is the grex name for the group of hybrids between Magnolia acuminata and Magnolia liliiflora which was originally performed at Brooklyn Botanic Garden.
33 brooklinensis		(Kehr)
34 x brooklynensis	Eva Maria	Flowers magenta rose on the outside with some trace of yellow-green on buds. Pale pink within. Pretty.
35 x brooklynensis	KO 1	(Joe McDaniel) a little brighter than Woodsman (acuminata x liliiflora O'Neill)Flowers with unusual green-yellow to purple and chocolate shades. A moderately strong upright grower. Late blooming, hardy.
36 x brooklynensis	Woodsman	Delightful, lemon scented, deciduous shrub or tree with white flowers having a pink flush at their base.
37	Biondii	(acuminata x x brooklynensis) (Heineman). Yellow flowers, 6 ins diam., open-cupped, slightly green on outer surface.
acuminata x		Flowers as leaves appear.
38 brooklinensis	Ultimate Yellow	
39 acuminata	Sundance	Pentaploid (10x), larger flowers than Sundance.
acuminata x		
40 brooklinensis	Woodsman x Sundance	(Kehr)
campbellii var.		(NZ)Flowering later than campbellii but with richer solid pink cup and saucer flower.
41 mollicomata	Charles Raffill Simpson form	
campbellii var.		NZ) Has extremely large flowers cup and saucer shaped, white with mauve-pink-base
42 mollicomata	Como	Sundance with doubled chromosomes, the blooms are larger in size and deeper yellow than those of 'Sundance'. It also has larger leaves and thicker stems. (Kehr)
43 acuminata	Sun Ray	A robust ,deciduous tree having cup saucer shaped, fragrant, bright pink flowers.FCC.
45 campbellii		
46 campbellii	Betty Jessel	A remarkable, late flowering seedling of ' Darjeeling' that has exceptionally beautiful, large, bright pink to crimson colored blooms. Named by Sir George Jessel after his wife. AM, FCC (campbellii var. mollicomata x liliiflora Nigra) AM Very attractive with deep red-purple buds which open into large star-shaped flowers with narrow lilac-pink tepals, produced freely on young trees.
47	Caerhays Surprise	
campbellii x		Huge clear deep rose pink bowl-shaped blooms, white within.
48 mollicomata	Charles Raffill	AM, FCC, AGM.
Charles Raffill x		
49 denudata		
50 campbellii	Collected Wild in Bhutan	An exceptional form related to the mollicomata group, so it flowers younger.Deep rose-crimson outer surfaces with colour extending to upper surfaces and gradually paling to white along the tepal centres.
51 campbellii	Darjeeling	(campbellii x liliiflora) Deep rosy purple flowers with white inner surfaces, cup and saucer shaped. Sister seedling to Star Wars. Flowers when young.
52	Early Rose	
53 campbellii	Eric Walther	Blooms abundantly, 12 tepals, flowers rose pink.
54 campbellii	Ethel Hiller	Very large flowers, petals white with a faint pink centre.
campbellii x		(Charles Raffill group) FCC Large flowers, rich pink outside.Produced on younger trees. A sister seedling to Charles Raffill, although not quite as dark, remarkable cup and saucer shape.
55 mollicomata	Kew's Surprise	
56 campbellii	Köln	Very nice and hardy in Cologne
57 campbellii	Lamellen	A good pink selection from Lamellen Garden, Cornwall.
58 campbellii	Landicla	Very large and beautiful deep-pink flowers.
59	Princess Margaret	(campbellii var. Alba x sargentiana var. robusta?) Outside shading from red purple and inside cream tinged with red purple. FCC.

60 campbellii	Queen Caroline	Red-purple flowers on the outside, paler inside when fully opened.. Registered by the Royal Botanic Gardens at Kew. AM
campbellii var.		Campbellii selection from Strybing. Attractive foliage, outer tepals turn down.
61 alba	Strybing White	
62 campbellii	Trengwainton	(F2 from Kew's Surprise). Pretty.
63 campbellii	Veitch Clone	Probably the most widely distributed pink form. FCC 1903
64 campbellii	Hybrid A	Very large pink flowers. Selected by Sir Peter Smithers.
65 campbellii	Hybrid B	A good pink. Selected by Sir Peter Smithers.
66 campbellii	Hybrid C	Flowers in a fine self pink. Selected by Sir Peter Smithers. FCC.A beautiful creamy-white form with large open tulip-shaped blooms.
67 campbellii	var. Alba	
campbellii var.		
68 mollicomata	Alba Borde Hill	Pure white, cup and saucer shaped. Forrest collection
campbellii var.		
69 alba	Caerhays White Clone	Cup shaped, 12 tepaled, ivory white flowers. FCC 1951
campbellii var.		
70 alba	Chyverton	A good white cultivar.
campbellii var.		
71 alba	Sir Harold Hillier	(campbellii var. alba) A quite superb white.
campbellii var.		
72 mollicomata	Bernie Hollard	Rich pink toned rose-lavender cup and saucer. A compact dome-shaped tree.NZ selection.
campbellii var.		
73 mollicomata	Lanarth	Large cupped blooms of deep lilac-purple produced in late winter/early spring. Medium-sized narrowly pyramidal habit. No. F25655 FCC
campbellii var.		
74 mollicomata	Lanhydrock	
campbellii var.		
75 alba	Maharanee	A superb form of Todd Gresham with large , perfectly symmetrical, white flowers.
campbellii var.		
76 mollicomata	Peter Borlase	Seedling from campbellii var. mollicomata. Has a superb unusual colour of deepest rose with pale broad band along centre of petal.
campbellii		
77 var.mollicomata	Sidbury	Deep rose shaded purple. Excellent.
campbellii		
78 var.mollicomata	Treve Holman	(campbellii var. mollicomata x sargentiana var. robusta). Deep rose pink, with red-purple shading.
79 campbellii	Wakehurst	Cup-shaped nearly pure red flowers, outstanding.
80 mollicomata	Werrington	Large blue purple flowers. Eye-catching colour. No. F25655
81 mollicomata	Burncoose white	
82 campbellii	Elisabeth Holman	
83 cylindrica	Wild Collection	
84 cylindrica	Wild Collection	
85 cylindrica		Tulip-shaped pure white elongated flowers, tinged rose-pink at the base. AM, AGM.
8501 cylindrica	NA 60704 SAS S CW China (85 L)	
8502 cylindrica	NA 60714 SAS FF CW China(85-)	The last two from Peter Warton, BotanicaGarden, University of Brithish Columbia, Vancouver, BC, Canada, from original scions collected in China in 1988
86 cylindrica	Hohman	Kehr selection
87 dawsoniana		beautiful, large, fragrant, rose colored flowers having many tepals. AM (dawsoniana x sprengeri Diva seelection) AM Crimson fading to carmine-pink. Attractive dark green rounded foliage on a compact, upright dome-shaped tree.
88 dawsoniana	Chyverton red	
89 dawsoniana	Chyverton pale form	
90 dawsoniana	Clarke	Beautiful large rich pink flowers.
91 dawsoniana	Strybing Clone	Large pink flowers with many long tepals.
92 delabata		
93 delavayi		Large evergreen leaves, ivory white flowers. FCC
94 fraseri		Wild collected in North Carolina, milk-white flowers. AM
95 fraseri	var. pyramidata	Medium-sized fragrant cream flowers.
96 globosa		Indian form, seedling. Creamy white flowers. AM
97 campbellii	Kew's Surprise Trengwainton	
98 campbellii	Burncoose Tennis Court	Campbellii selection
99 dawsoniana	Villa Taranto	
100 grandiflora		

101 grandiflora	Angustifolia	leaves narrowly acuminate. Flowers typical.
102 grandiflora	Baby Doll	A slow-growing small-leaved miniature form.
103 grandiflora	Charles Dickens	A tetraploid magnolia with beautiful foliage and attractive red seed pods. Excellent.
104 grandiflora	Edith Bogue	A hardy form with nice leaf colour.
105 grandiflora	Exmouth	An upright form with elongated foliage and rusty brown felt lightly covering undersides of the leaves. Quite large creamy-white flowers often have extra tepals in the centre. AGM
106 grandiflora	Ferruginea	Creamy-white, rusty undersides of the leaves. (grandiflora x virginiana). Compact columnar habit with smaller grandiflora-like leaves and white fragrant flowers. Looks like grandiflora and very hardy.
107 grandiflora	Freeman	White large cup-shaped flowers
108 grandiflora	Gallissoniere	
109 grandiflora	Gallissoniere nana	A small tree with white large cup-shaped flowers.
110 grandiflora	Goliath	Large creamy-white strongly fragrant flowers. Leaves different from the others in that they are large broad blunt-tipped waved, with little, if any, bronze felt beneath. AGM; AM The exceptionally narrow strap-like glossy green leaves and dwarf compact habit makes this cultivar look more like a plant of Viburnum macrophyllum than grandiflora. A choice landscape shrub or small tree that is well worth growing for the unique foliage and form. A good choice where cold and snow are a problem.
111 grandiflora	Harold Poole	Dwarf, flowers are cup-shaped, creamy-white. Makes a small tree with a compact narrowly columnar habit. Foliage is dense glossy deep green and heavily felted beneath.
112 grandiflora	Little Gem	Attractive broad foliage with undulations between the veins of the glossy foliage makes the tree attractive even when the large flowers are absent.
113 grandiflora	Majestic Beauty	(grandiflora x virginiana). (a Freeman hybrid) AGM An excellent hybrid with large creamy white flowers. Intense citrus lemon fragrance. Upright densely branched round-crowned tree.
114 grandiflora	Maryland	
115 grandiflora	Millai's Clone	From Fota Botanic Garden, Ireland.
116 grandiflora	Nanetensis Flore Pleno	White, sometimes produces double flowers. A choice dwarf selection from Joe McDaniel with rounded compact form, small leaves and horizontal branching. Very fine.
117 grandiflora	Orbit	Large fragrant creamy-white flowers. Smallish dark green narrow pointed leaves, rich russet suede underneath. Small tree with narrow pyramidal habit.
118 grandiflora	Russet	Creamy white fragrant flowers.
119 grandiflora	Saint Georg	A small pyramidal tree. Large fragrant cup-shaped flowers. Blooms at an early age.
120 grandiflora	Saint Mary	Distinctive neat attractive oval glossy ribbed leaves. Dark green with bright russet brown beneath. Large cream flowers 25-30 cm across, very fragrant.
121 grandiflora	Samuel Sommer	Attractive wavy long green leaves.
122 grandiflora	Undulata	A very hardy tree from B.C. Dark green glossy foliage and heavy dark brown felt on leaves. Creamy-coloured flowers.
123 grandiflora	Victoria	
124 grandiflora	Montreux Bowl-shaped	
125 grandiflora	Montreux semi doubled	
126 grandiflora	Montreux fiori grandi	
127 grandiflora	Francais Trecques	Very hardy form from France, Val Aubonne. Beautiful pure white flowers with delicate sweet-scented perfume. FCC, AGM.
130 denudata		
131 denudata	x cylindrica	White selection
132 denudata	China Form	White flowers, small purple base.
133 denudata	Caerhays	A good form from NZ, pure white flowers. Elegantly large broad-tepal clear pink with a light fruity fragrance. Very fine.
134 denudata	Forrest's Pink	
135 denudata	Gere	A late flowering ivory-white, one of the best. (Kehr)
136 denudata	Japanese (Wada's) Clone	(syn. Wada's Clone) Late flowering, white.
137 denudata	Purpurascens	(x sprengeri var. Diva) A hardy hybrid with large pink flowers.

138	denudata obovata	x Sprengeri Diva	
139	(hypoleuca)		Seedling; large leaves. Creamy-white flowers. FCC, AGM
140	hypoleuca	Pink Flush	Outside of tepals pink.
141	hypoleuca	x Fraseri	(Savage, USA)
142	hypoleuca	x tripetala	(Savage, USA)
143	hypoleuca	x (x wieseneri)	Rosy Cheeks a elegant tree perfectly formed, fragrant , creamy white flowers that are produced in abundance followed by bright crimson fruit.
144	denudata	Sawadas Cream	
145	denudata	Giubiasco	
146	hypoleuca	Selection	An extremely hardy form, collected by Goteborg Botanical Garden, from Prefecture. Iwate in northern Honshu.
147		Sonnleiten	(Iennei x soulangeana nigra) G. Pardatscher (A)
150	kobus		Seedling. AM.
151	kobus	var. borealis	a diploid upright tree.
152	x kewensis	Parson's Clone	large fragrant showy white flowers.
153	kobus	Tetraploid	lager than usual kobus. (Kehr)
154	kobus	Diploid	This is the undoubled part of kobus tetraploid. It is interesting to grow them for comparison of diploid with tetraploid. (Kehr)
155	kobus	Wada's Arboreal Form	
156	sprengeri Diva	x stellata Waterlily	(Savage, USA).
157	X loebneri		(kobus var. kobus x stellata). AGM.
158	X loebneri	Ballerina	(Spring Snow x stellata Waterlily) Flowers have up to 30 tepals. White flushed pink at base. Pleasantly fragrant.
159	X loebneri	Donna	An outstanding pure white clone with handsome flat fragrant flowers. Excellent. One of the best. (Heinemann).
160	X loebneri	Encore	Dwarf Ballerina seedling. Very slow growing and flowers at an early age with double flowers. Long flowering season
161	X loebneri	Leonard Messel	Very nice deep purple-pink flowers. Blooms from an early age. AM, FCC, AGM.
162	X loebneri	Mag's Pirouette	(Tetsuo Magaki, Japan) Ballerina seedling. Its outer tepals are shorter than the inner ones, therefore the flower remains small (4 inches across). Very lovely.
163	X loebneri	Merrill	Semi-double white flushed pink. Blooms very nice. Flowers from an early age.AGM
164	X loebneri	Neil McEachern	small white flowers. AM.
165	X loebneri	Powder Puff	Seedling of Ballerina. Flowers have tepals that stand up straight, giving the flowers an appearance of a paintbrush. (Kehr)
166	X loebneri	Spring Snow	Pure white fragrant flowers in quantity.
167	X loebneri	Star Bright	Fragrant pure white flowers. (Ballerina x unknown) Flowers are white (occasional light purple mid rib mark at base of back of tepals. Sweetly fragrant of strong intensity. Flowers average 22 tepals.
168	X loebneri	White Rose	Star-shaped white flowers. Slow growing rounded bushy habit. AGM, FCC.
169	stellata		From Japan. Good pink, multi-tepalled flowers like ball-shaped Chrysanthemum.
170	stellata	Chrysanthemumiflora	A pale pink form with about 40 tepals.
171	stellata	Dawn	Pink buds become multi-tepalled white flowers.
172	stellata	Dr. Massey	From Japan. White.
173	stellata	f 55	White flowers, very good form.
174	stellata	Centennial	(Kehr). Stellata tetraploid, originating from Wisley.
175	kobus	Janaki Ammal	Pink
176	stellata	Keiskei	Soft rose-pink buds open white tinged with pale pink at the base. Rounded bushy habit.
177	stellata	King Rosea	Polyploid. Flat full white flowers with broad rounded tepals, like tulips. FCC.
178	stellata	Norman Gould	
179	stellata	Rosea Jane Platt	
180	stellata	Royal Star	
181	stellata	Rosea f.v.	
182	stellata	Select Pink	
183	stellata	Tetraploid Nr.1	
184		Massy Rosea	

185	The Spira	
186 kobus	Octopus	(Kehr)
187 stellata	Scented Silver	
189	Legacy	(denudata x Sprengeri Diva) Flower color red-purple outside and white inside. Blooms mid to late April. A magnificent tree with huge leaves up to 90 cm long. Sommer blooming. Very large creamy-white flowers are toned wine-purple in the throat. FCC.
190 macrophylla		A botanical variety of macrophylla which is very limited in distribution. Similar large foliage with cream flowers blotched wine-purple within, up to 30 cm across, but on a dwarf plant. Blooms in the Summer.
191 macrophylla	Ashei	
192 macrophylla	var. Ashei x Macrophylla	
193 macrophylla	var. Ashei x sieboldii	
194 macrophylla	Gwavas	From New Zealand.
195 macrophylla	Whopper	White flowers spotted purple.
196 macrophylla	Whopper x Ashei	Large white flowers spotted purple in summer
197 macrophylla	Whopper x Sarah Gladney	
198 officinalis		Large white fragrant flowers. Large leaves, parchment coloured flowers with maroon centre.
199 officinalis	var. biloba	
200 fraseri	Pyramidata	Wild collected in North Carolina, milk-white flowers. AM
201 liliflora		slow-growing shrub with deep purple flowers. The largest, darkest, broadest tepalled, dark red-purple inside and outside. Fragrant. 8 tepals.
202	Darkest Purple	
203	Gracilis	A small shrub, flowers small, outside deep purple. Deep reddish purple flowers, 6-8 tepals, spicy fragrance, dark inside and outside.
204	Holland Red	deep red-purple flowers.
205	Lyon's form	An interesting miniature version of liliiflora. Flower colour is similar but all other characters are about one-third the size.
206	Mini Mouse	Bushy plant with large slender flowers, vinous purple outside, creamy-white stained purple inside. Flowers late. AGM, AM, FCC.
207	Nigra	
208	Kosar - Devos Hybrid	
209 liliflora	x (x Veitchii)	Tall upright tree with large purple blooms.
210 officinalis	var. biloba x (wieseneri)	(Savage)
211	Nitida	AM.
212 liliflora	Nigra compact	
213	Judy	(campbellii x sargentiana var. robusta) This hybrid from Nigel Holman produces splendid, large, rich rose-pink flowers of good form. huge attractive leaves and creamy white flowers tinged pink. AM.
214	Buzzard	(seedling). Tall conical tree. Fragrant white flowers that are tinted pink at the base. AGM, AM, FCC
215 rostrata		
216 salicifolia		
217 salicifolia	Broad Leaf Clone	
218 salicifolia	Fastigiata	(salicifolia x Kobus) Large and profuse pure white flowers with red-tipped stamens.
219 salicifolia	Lufer	Broader leaves and larger flowers, compact growing form.
220 salicifolia	Jermyns	Flowers white, a fine fragrant selection, bamboo-like foliage.
221 salicifolia	van Veen	Large tree. Huge rose-pink flowers on the bare branches late in the season. FCC
222 sargentiana		very dark and very late form, magnificent.
223 sargentiana	Caerhays	
224 sargentiana	var. robusta	FCC. Clearest rose-purple with delicate shading of paler tone.
225 sargentiana	Blood Moon	Large deep rose-pink flowers, very hardy.
226 sargentiana	Chyverton Dark Form	Rose-purple flowers.
227 sargentiana	Chyverton Pale Form	Huge white to pale pink flowers.
228 sargentiana	Lausanne	(Flinck) huge rose-pink flowers. (campbellii var Alba x sargentiana var. robusta). Purple flowers. AM.
229	Michael Rosse	

230	Gretel Eisenhut	(sargentiana var. robusta x (sargentiana var. robusta x campbellii)) Very big flowers with broad tepals, deeper pink in colour due to campbellii parentage. Early.
231	Mossman's Gigant	(campbellii var. mollicomata x sargentiana var. robusta) Pretty, large pink flowers
232 sargentiana	Nymans	Collected wild in 1908 in Wa-Shan. (acuminata Fertile Myrtle x sprengeri Diva) (Dick Figlar). The outer three tepals of the flowers are distinctly peach-coloured, the others being pink. The flowers are very large and floppy. (The original tree is 30 feet tall with a trunk 14 inches in diameter after 15 years)
233	Philip Tregunna	Flowers pink.
234 sargentiana	Seedling A	(named by Sir Peter Smithers). Former Seedling B. Flowers pale pink with 24 petals.
235 sargentiana	Vico Multipetal / Seedling B	
236 x sprengeri Diva	Caerhays Belle	
237 salicifolia	Wild Mt-Hakkada(Japan)	
238 sieboldii	Collossus	sieboldii 'Genesis' (tetraploid) x sieboldii (diploid) Flowers are white deep red stamens. Frequently the flowers contain extra tepals, up to as high as 20 Tepals. It flowers late. The tree is multi-stemmed. Double-flowered form, 16-24 tepals on a 4-inch diam. flower. Flowers flat, rather than cup-shaped. Seedling of sieboldii. (Heineman, USA).
239 sieboldii	White Flounces	(seedling) Fragrant flowers with rose red staminoid centre. Spectacular red fruits. AGM, FCC.
240 sieboldii		(seedling) Double form from Japan. A beautiful white flower.
241 sieboldii	Michiko Renge Seedling	White flowers, semi-double.
242 sieboldii	Semi Plena	Darker red stamens than the commoner form. A slightly more compact grower.
243 sieboldii	Red Eye	A semi-double flowering.
244 sieboldii	Harold Epstein	(6x) pure white tepals and very dark red stamens.
245 sieboldii	Pride of Norway (old 6x)	(Kehr)
246 sieboldii	Tetraploid Nr. 1	(Kehr)
247 sieboldii	Tetraploid Nr. 2	A wonderful hybrid from August Kehr.
248 sieboldii hybrid	x tripetala	Double-flowered form, 16-24 tepals on a 4-inch diam. flower. Flowers flat, rather than cup-shaped. Seedling of sieboldii. (Heineman, USA).
249 sieboldii	White Flounces	
250	Yellow Stamens	(seedling) Nodding white cup-shaped flowers. AGM, AM, FCC.
251 sinensis		Strong scent, abundant flowers like a semi-double camellia (seedling). Double flowers, 3 weeks earlier than the original sinensis. Abundant second flowering in August.
252 sinensis	Ursula Grau	AM.
253 sprengeri		Vivid pink flowers.
254 sprengeri	Copeland Court	Small bushy tree, the white flowers are stained rose. AM.
255 sprengeri	var. elongata	Large fragrant deep pink flowers in great profusion. Flowers early.
256 sprengeri	Diva	A great reddish-purple, superb, good grower.
257 sprengeri	Burncoose	A great reddish-purple, superb, good grower.
258 sprengeri	Burncoose	
259 sprengeri	Caerhays	
260	Eric Savill	A seedling of Diva. AM. Fragrant deep pinkish purple, multi-tepalled, the tepals are coloured on both sides.
261 sprengeri	Doubled Form A	(Kehr)
262 sprengeri	Doubled Form B	(Kehr). Flowered after 4 years.
263 sprengeri	Köln	Very nice and hardy, from Cologne, Germany.
264 sprengeri	Lanhydrock	Seedling of Diva, very deep pink. Peter Borlase, Lanhydrock, Bodmin (GB).
265 sprengeri	Thomas Messel	Sprengeri Diva selection, white.
266 sprengeri	Trengwainton	
267 sprengeri	Diva x Denudata	Single trunked tree, big white flowers, dens, dark green foliage. Flowers much larger than Denudata.
268 sprengeri	Diva x(x loebneri) Merrill	Dark green foliage. Flowers much larger than Denudata.
269 sieboldii	South Korea	hardy seedling from South Korea (Miller).
270 sprengeri	Diva x Picture	Dark pink flowers.
271 sieboldii	Multipetalled	(Kehr)
272 sieboldii	15 tepals	(Miller).

273 tripetala	Bloomfield	large leaves and very large, creamy white flowers having 16 tepals and a hint of pale pink.
274 tripetala	Bloomfield x Hypoleuca	hypoleuca Bloomfielt x tripetala Wada.
275 tripetala	Tripetala	(seedling) Huge leaves and large, erect, vase shaped, creamy white, muskily scented flowers.
276 virginiana		(Seedling). Creamy-yellow, very fragrant.
277 virginiana	Doubled	(Kehr).
278 virginiana	Henry Hicks	Flowers white, evergreen, fragrance lemon-like, pollen very pale, yellow to white.
279 virginiana	Opelousas	Broad oval leaves and large flowers
280 virginiana	Parish Tree	A choice selected clone.
281 virginiana	Tetraploid	(Kehr). Very slow growing.
282 virginiana	wild form	A hardy wild form.
283 virginiana	x (x wieseneri)	
284 virginiana	Whitesides Largest	A selced large evergreen type.
285 wilsonii		Elegant hanging flowers best seen from below. AGM, AM, FCC.
286 zenii		White flowers, lower half purple. New introduction from China. (Graham Rankin)
287 virginiana	x Freeman	
288 sieboldii	floreplena Ferry Jones	Double form of about 36 petals with a showy disc of stamens (Ferry Jones)
289 sprengeri	Diva Simpson Form	(NZ)
290 sieboldii	Pink tipped tepals # 1	(Miller)
291 sieboldii	Pink tipped tepals # 2	(Pink tipped tepals # 2) (Miller).
292 sieboldii	Pink tipped tepals # 3	(Miller)
293 sieboldii hybrid	hypoleuca x tripetala	(Southern Belle)
294 sieboldii	best polyploid form	best polyploid form.
295 sieboldii hybrid	x (x wieseneri)	(Savage, USA)
296 Gresham	14 Karat	(denudata x x veitchii). Flowers porcelain white
297 Gresham	Moondance	(prob. (soulangiana x x veitchii)). Huge white flowers. (Allen Smith, Alabama). Early blooming, upright, columnar growth. Outer surface of flowers red-purple, with dark purple stripe in centre of tepal; inner surfaces white
298 Gresham	Full Eclipse	Large purple-red flowers. Vigorous, floriferous tree.
299	Sentinel	(campbellii x soulangiana) (Magaki, Japan, named after Mr. Magaki's wife) Pink 9-inch flowers with 12 round tepals opening flat.
300	Setsuko	
301	LA 21	
302	Anticipation	The flowers are white. It flowers early, about late March.
303	Eskimo	Lennei x Norman Gould. This is probably a triploid, but does produce seed. The color is very light lilac which appears white in the distance. Flowers are produced mid late, but the open flowers have withstood at least 6 degrees of frost. Very slow growing. Interesting because the flowers are so frost tolerant. (cordata 'Miss Honeybee' x 'Sundance') The flowers have a heavy textre, and are a very deep yellow color. It flowers late, and therefore escapes frost damage. It is slow growing and will not be a large tree at maturity.
304	Golden Endeavor	Excellent deep pink colored flowers with about 35-40 tepals, but it is now clear that there is no evidence of Diva in this plant. Roots readily from greenwood cuttings. Nice shaped bushy tree. Outstanding, but flowers a little too early in most years to escape late frosts.
305	Pink Perfection	(Woodsman x Gold Star) hardy, yellow flowering hybrids.
306	Solar Flair	Flowers late in the season.
307	Tranquility	(Woodsman x Gold Star) Flowers color a light yellow that is non-fading. Chosen for its lighter yellow color.
308	Stellar Acclaim	(Woodsmann x Golden Star) Flowers are deep yellow., flowers mid -Mayto late May. Trre is somewhat branching.
309	Sunburst	(Woodsman x Gold Star) Deep yellow of medium size. Tree is very floriferous. Excellent.
310	Serenade	Lennei x Gresh. 'Jon Jon' . Flowers are a light little color, which in the distance appear white, large flowers. Tree is somewhat upright in growth. Flowers late in the season.

311	acuminata	Sleeping Beauty	Tetraploid. Miss Honeybee x Sundance. This hybrid is unique because it remains fully dormant for 3-4 weeks after all other plants nearby have flowered and leafed out. Flowers are yellow.
312		Gold Cup	Tetraploid. Lennei x Elizabeth. Very heavy textured flowers of deep yellow color. This hybrid is unique because the flowers are cup shaped.
313		Hot Flash	(Woodsman x Elizabeth). Very good deep yellow, the tree is very late flowering. (liliiflora x cylindrica) x Ruby. Flowers are deep purple. The tree is slow growing and probably will be a small tree. The plant is unique because it produces flower buds up and down the stem before it does leaf buds. Consequently it starts to flower in march and continues to flower all season until the first killing frost in the autumn. Sterile seed cones stand upright like candles.
314		March till Frost	
315		Eduard A. Kehr	Octoploid kobus, very vigorous, huge leaves.
316		Woodsman x Elizabeth	Yellow flower, very upright growth, late flower
317	officinalis	x Wieseneri	(Kehr). Large tree, vigorous, white fragrant flowers, fertile and sets open pollinated seed, has pink outer tepals. (Tetsuo Magaki) Pure white 7- inch flowers often suffused with pink at base on the abaxial side, opens perfectly flat and usually faces sideways or somewhat downwards. 6 petals, obicular to broadly obovate, base narrowly clawed, snowy white, samens cream, sometimes tinged with light purple on the abaxial surfaces of connectives. It is a very slow grower and has eight years from graft to have the first bloom. (Seedling of Kobus borealis) Very interesting Magnolia with 52 tepals.

328		J.C.Williams	(Sargentiana robusta x Sprengeri Diva) very hardy Flowers white with red stamens. Flowers late, about June. Plant low growing, forming multiple stems.
330		Genesis	
331		Mystery	
332		Pastel Beauty	(veitchii x acuminata) flowers a pretty light pink with a light yellow background. Very good. (sieboldii x (tipetala x obovata)) Flowers white, very fragrant. Flowers in June after all danger of frosts, and after the tree has leafed out. The Tree is multi-stemmed and low growing with red stamens.
333		Southern Belle	(Woodsman x Elizabeth) Flowers are very deep yellow. It flowers before the leaves appear in mid to late May, long after any danger of frost.
334		Sunsation	(tree R-18-14) The flowers are deep yellow of good size and are plentiful. Growth upright

398 Gresham	Sarahs Favorite	Large purple flowers, tepals white inside. Seedling of W.B.Clarke by Interraran Garden of Spain by Almandoz, flower frost hardy, notice the sepaloid stamens, very characteristic and nice. Attractive pyramidal growth, nice autumn color too.
399 salicifolia	Aia	(cylindrica x veitchii Peter Veitch) Flowers are large, opening from 23-30 cm across, the petals pure white inside but with a slight greenish tinge towards the base outside; the stamens with crimson anthers and pink filaments. In bud the flowers are sheathed in downy bracts which are a splendid golden-fawn colour.
400	Albatross	

401	Ann Rosse	(denudata x sargentiana var. robusta) a tree with large 9 tetepaled , chalce- shaped white blooms, with slowly deepen to reddish purple at the base. AM (campbellii var. mollicomata Lanarth (?) x liliiflora Nigra) Deep rose-pink buds, rosy red flowers shading to purple at the petal base, with a lighter shading on the inside of the flower. Fragrant. Flower from an early age. Open spreading small tree.
402	Apollo	(Mark Jury x soulangiana Lennei alba) Large 20-25 cm wide-cupped blooms with silky textured petals bicoloured in white at the rim, shading down into rosy-purple with an ivory-white interior. Fragrant, flowers from an early age.
403	Athene	(Mark Jury x soulangeana Lennei alba) Huge lilac pink with creamy-white interior. Wonderful cup-shaped blooms up to 35 cm. Fragrant. Flowers from an early age. A small rounded tree.
404	Atlas	(soulangiana Wada`s Picture x sprengeri Diva) Very vigorous grower. Flowers open to a tall cup shape. They are red-purple outside and white within. Long lasting, they continue to enlarge and nod to horizontal white fading to a pretty pink and white.
405	Big Dude	(macrophylla x virginiana) Similar to Karl Flinck, but with unspotted flowers.
406	Brigitta Flinck	(soulangiana Lennei Alba x x veitchii)
407 Gresham	Royal Flush	(sprengeri Diva x Wada`s Picture) (Savage USA). Beautiful hardy plant with very pretty pink flowers.
408	Felicity	(sargentiana var. robusta x sprengeri Diva). Broad-petalled bowl-shaped flowers of bright salmon pink in great profusion. Attractive upright spreading. Growth outstanding.
409	Caerhays Belle	syn J.C.Williams (sargentiana var. robusta x sprengeri Diva)
410	Caerhays New Purple Seedling	Deep pink upright flowers
411	C.B. # 5	(denudata x sargentiana var robusta). A superb hybrid with very dark purple flowers.
412	Cecile Nice	(sieboldii x tripetala). Creamy white with good fragrance; tepals crumpled like taffeta. A small tree with with pleasantly fragrant, creamy white flowers having reddish stamens. AM
413	Charles Coates	(denudata x stellata Waterlily) Pale pink flowers having a white interior with 12 tepals is produced on a shapely small tree.
414	Emma Cook	(liliiflora Nigra x sprengeri Diva) Star-shaped red-purple flowers. AGM
415	Galaxy	Hybrid from Marwood Hill (Dr. A.J. Smart). Magnificent.
416	Marwood Spring	White with pink stripes.
417 Gresham	Candy Cane JG 28	(soulangiana Lennei Alba x veitchii). White with a crimson stipple.
418 Gresham	Crimson Stipple	(soulangiana Lennei Alba x veitchii). Greenish buds become cream-coloured flowers.
419 Gresham	Cup Cake	A little tender; white with purple base.
420 Gresham	Dark Shadow JG 30	(soulangiana Rustica Rubra x veitchii). Large open wine-red flowers 9-12 broad tepals. A vigorous grower with rounded form. Late
421 Gresham	Darrell Dean	Large white campbellii-type.
422 Gresham	David Clulow LA-20	Very fine.
423 Gresham	Deep Purple Dream	(soulangiana Lennei Alba x x veitchii Rubra) A small compact grower with pretty white flowers.
424 Gresham	Delicatissima	(soulangiana Lennei Alba x x veitchii). Large fragrant creamy-white flowers.
425 Gresham	Elisa Odenwald	Big white floppy flowers.
426 Gresham	Floppy LA 82	(campbellii x pink Gresham hybrid). Deep pink campbellii-type flowers with typical cup and saucer form, 12 tepals, upright grower. Late.
427 Gresham	Frank Gladney	Small pink.
428 Gresham	G 66-6	(liliiflora x x veitchii) Reddish pink, unusual vase-shaped flowers. AGM.
429 Gresham	Heaven Scent	(soulangiana Rustica Rubra x x veitchii). Very deep purple having a good form and broad tepals.
430 Gresham	Joe McDaniel	Very fine, huge pink.
431 Gresham	Joe McDaniel 2	Huge well shaped white.
432 Gresham	JG 11	

433 Gresham	JG 16	
434 Gresham	JG 21	Large white.
435 Gresham	Jon Jon JG 3	Late, white blushed pink.
436 Gresham	LA 3	
437 Gresham	LA 16	White, 9 petals.
438 Gresham	LA 31	Dark purple pink.
439 Gresham	LA 81	Dainty purple pink. 440
440 Gresham	Manchu Fan	(soulangiana Lennei Alba x x veitchii). Fragrant white flowers, late.
441 Gresham	Mary Nell	(soulangeana Lennei Alba x x veitchii Peter Veitch) The cup-shaped white flowers open flat to slightly recurved. The 9 tepals are stained a glowing purple-red outside at the base and along a fine line up the centre of the tepal to the tip. The inside of the tepals are pure white. A bush tree-like grower with large olive-green foliage. Blooms in the late spring. New.
442 Gresham	Peppermint Stick	(liliiflora x x veitchii). Large white long flowers striped purple. AGM
443 Gresham	Peter Smithers	(soulangiana Rustica Rubra x x veitchii) The large purple pink broad-tepalled flowers have a white inner surface with pink highlights that contrasts nicely with the reddish stamens. It is a fast, vigorous, upright grower with large leaves and it produces many large well-formed flowers about mid-season.
444 Gresham	Pink Goblet G 66-12	superb large pink cup-shaped flowers.
445 Gresham	Deep Purple Dream	Deep purple flowers.
446 Gresham	Raspberry Ice	(liliiflora x x veitchii) luminous lavender-pink flowers, late.
447 Gresham	Rouged Alabaster	(soulangiana Lennei Alba x x veitchii) Large broad white flowers, base flushed pink.
448 Gresham	Royal Crown	(liliiflora x x veitchii). Reddish pink, white inside, long narrow petals. A tall vigorous grower.
449 Gresham	Sayonara	(soulangiana Lennei Alba x x veitchii). Superb pure white fragrant tulip-shaped blooms. The long tapered candle-like buds are arranged nicely on the branches. A healthy robust grower that blooms during the late spring.
450 Gresham	Sweet Sixteen	(soulangiana Lennei Alba x x veitchii). Large fragrant creamy-white flowers.
451 Gresham	Sulphur Cockatoo	(soulangiana Lennei Alba x x veitchii). A vigorous fast growing tree with pure white large fragrant flowers. Late.
452 Gresham	Tina Durio	white with pink flush
453 Gresham	Tiffany	(soulangiana Rustica Rubra x x veitchii). Broad-tepalled purplish pink flowers, white inner surface. A fast-growing tree.
454 Gresham	Todd Gresham	wide open purple flowers.
455 Gresham	Winelight JG 15	(campbellii x sargentiana var. robusta). Rich rose-pink.
456	Hawk	(Mark Jury x soulangiana Lennei). Very large bowl-shaped blooms, flushed rose-pink, deeper in bud, creamy white inside.
457	Iolanthe	Flowers at an early age.
458	Jersey Belle	(sinensis x wilsonii) large white nodding fragrant flowers.
459	Karl Flink	(macrophylla x virginiana) Vigorous, hardy clone with flowers intermediate between parents. Inner tepals show purple blotch.
460 x kewensis		(kobus x salicifolia). Pure white flowers. AM.
461	Leather Leaf	(soulangiana Lennei alba x x Veitchii Big White flowers with good substance
462	Lilenny	(liliiflora x stellata Rubra)
463	Lotus	(Mark Jury x soulangiana Lennei Alba) Huge creamy-white blooms, blushed pink at the base, like a giant lotus blossom floating on bare branches in early spring. Jury hybrid.
464	Marij Gossler	(denudata x sargentiana var. robusta) The large flower buds are reddish pink and open to pink flushed flowers.
465	Mark Jury	(campbellii var. mollicomata Lanarth x sargentiana var. robusta) A medium large round-headed tree with large soft lavender-rose blooms, paler within

466	Milky Way	(Mark Jury x soulangiana Lennei alba). An erect neatly rounded tree of about 5 m in height and exhibits a prolific show of mid-spring blooms in milky-white shades, rose-pink towards the flower base. Fragrant flowers from an early age.
467	Moon rocket	(denudata x veitchii). (Blumhardt, NZ)
468	Nakamura 1 Bunju	Pale pink
469	Nakamura 2	
470	Nakamura 3	
471	Nakamura 4	
472	Nakamura 5 Toju	Clear pink
473	Nakamura 6 w	
474	Nakamura 7	
475	Nakamura 8 Suishoren	A very fine pink colour.
476	Nakamura 10	White, small tree.
477	Nakamura 11	
478	Nakamura A	Late purple
479	Nakamura E	
480	Nakamura HO	
481	Nakamura KA	
482	Nakamura Purple	Purple, medium sized.
483	Nakamura 20 Kobato	white, pink blush, small tree.
484	Nakamura u	Early purple
485	Nimbus	(hypoleuca x virginiana). Dark green leaves with white flowers in late spring, very fragrant. (liliiflora x stellata). Deep reddish purple buds open to long tepals of uniform purple which slowly pales. Flowers white inside, quite weather tolerant. Compact bushy habit.
486	Orchid	
487 sieboldii	Pat's Delight	
488 sieboldii	Paul Cook	(x soulangiana pink Lennei seedling x sprengeri Diva) Very hardy beautiful large pink flowers, outstanding. (acuminata Fertile Myrtle x sprengeri Diva) (Dick Figlar). The outer three tepals of the flowers are distinctly peach-coloured, the others being pink. The flowers are very large and floppy. (The original tree is 30 feet tall with a trunk 14 inches in diameter after 15 years)
489	Philip Tregunna	
490 Pickard' Hybrid		
491 Pickard' Hybrid	Pickard's Charm	Medium-sized fragrant pink flowers.
492 Pickard' Hybrid	Pickard's Coral	White with fine rose flush and spots.
493 Pickard' Hybrid	Pickard's Crystal	Ivory-white with faint purple-pink flush
494 Pickard' Hybrid	Pickard's Firefly	Deep purplish wine-red, fragrant.
495 Pickard' Hybrid	Pickard's Garnet	Very deep wine-red (outstanding colour)
496 Pickard' Hybrid	Pickard's Glow	Wine-red fading to white, fragrant
497 Pickard' Hybrid	Pickard's Maime	Purple-pink shading to white, fragrant.
498 Pickard' Hybrid	Pickard's Opal	White, purple base, good form.
499 Pickard' Hybrid	PP7	Red-purple striped effect.
500 Pickard' Hybrid	Pickard's Pearl	Fragrant white with red-purple base of petals
501 Pickard' Hybrid	Pickard's Pink Diamond	Pastel pink on white, fragrant.
502 Pickard' Hybrid	Pickard's Ruby	Deep purple-red, one of the best.
503 Pickard' Hybrid	Pickard's Schmetterling	Fragrant elongated wine-red flowers, large tree.
504 Pickard' Hybrid	Pickard's Snow Queen	large pure white flowers, 6 tepals.
505 Pickard' Hybrid	Pickard's Stardust	kobus seedling, fragrant white.
506 Pickard' Hybrid	Pickard's Sundew	Creamy white flushed pink, very good grower.
507 Picture		Superb large red purple, dark outside and white inside.
508 Picture	Superba	Large white flushed pink, vigorous grower
509 Picture	White Giant	White slightly flushed pink, vigorous grower.
510 campbellii	Piet van Veen	Cup and saucer type campbellii. Named and selected by Graham Rankin, formerly head gardener of David Clulow. Flowers red purple outside, inside fading from red purple rim to pale chamois. Very attractive and unusual.
511	Porcelain Dove	(globosa x virginina). Very nice fragrant, porcelain white flowers. (Gresham). (denudata Gere x stellata Waterlily) A vigorous growing hybrid with upright, absolutely pure white flowers, multi-tepalled.
512	Pristine	Developed by Joe McDaniel.

513 x Proctoriana	(salicifolia x Stellata)	(salicifolia x stellata) a showy, small, deciduous, pyramidal tree with fragrant, white flowers that are produced before the leaves emerge in the spring. AGM
514 x Proctoriana	Slavin's Snowy	a splendid, fast growing, small tree with many fragrant white flowers
515 x kewensis	Wada's Memory	Pure white flowers. AGM, FCC
516	Purple Prince	(liliiflora Darkest Purple x soulangiana Lennei). Very dark purple flowers.
Kosar - Devos		
517 Hybrid		
Kosar - Devos		
518 Hybrid	Anne	(liliiflora x stellata) AGM. Fragrant purple, easy blooming, very hardy and easy to grow.
Kosar - Devos		
519 Hybrid	Betty	(liliiflora nigra x stellata) AGM. Fragrant dark reddish purple flowers, white inside, midseason blooming.
Kosar - Devos		
520 Hybrid	Jane	Upright Reddish purple outside and white inside, late blooming. AGM.
Kosar - Devos		
521 Hybrid	Pinkie	(liliiflora x stellata) AGM. Latest flowering of Kosar Hybrids. Soft pink with deeper pink near the base. Small tree. Excellent.
Kosar - Devos		
522 Hybrid	Ricki	(liliiflora x stellata) Red-purple, inside white, mid-late blooming. AGM
Kosar - Devos		
523 Hybrid	Susan	(liliiflora Nigra x stellata). AGM. Fragrant red-purple flowers, mid-season blooming.
Kosar - Devos		
524 Hybrid	Georg Henry Kern	(liliiflora Nigra x stellata). AGM. Fragrant red-purple flowers, mid-season blooming.
Liliflora x Mark		
525 Jury	Serene	(liliiflora x Mark Jury) Deep purple bowl-shaped flowers; fastigate growth. NZ. introduction. Late.
526	Jolly Roger	(denudata x sargentiana var. robusta) (Grey Gossler) Fast-growing tree-like plant with handsome pink and white flowers.
527 x gotoborgensis	Clone 2	(hypoleuca x wilsonii) (Nitzelius, Sweden)
528	Daybreak	(brooklynensis Woodsman x Tina Durio) A fine , late flowering, upright grower from Kehr with simply gorgeous, very fragrant, bright rose-pink flowers.
529 sieboldii	Genesisx Virginiana	
530	Purple Eye	(denudata x ?) Large white flowers stained purple at base. AM.
denudata x		
531 salicifolia	Snow White	(denudata x salicifolia) = Wada's Snow White. Snow white flowers that are exquisitely fragrant.
Kosar Devos-		
532 Hybrid	Randy	(liliiflora Nigra x stellata)
533 x gotoborgensis	Clone 1	
534	Fireglow	(cylindrica x denudata Sawada's Pink) Small but vigorous tree with 'spruce' shape, dark green, very coriaceous leaves. Flowers small but very shaped, light pink with brilliant wax-like cerise spot at tepal base that is unfading.
535	Yaeko	(Anne Rosse x liliiflora) (Tetsuo Magaki, Japan, named after his mother) A large dark red-purple flower almost the same colour as Galaxy, more red, less purple. Has 9-12 tepals and measures up to 8 inches across. It opens flat and reflexes later. Rather slender tree.
536	Rose Marie'	(M. 'Pink Surprise' x M. 'Daybreak') This hybrid has large flowers with nine broad tepals. The flower exterior is a vivid rosy pink and the interior is a solid, medium pink, a shade darker than M. 'Daybreak'. The tree blooms at a young age, is very floriferous, and blooms for up to six weeks. Excellent seed fertility. Zone 5. From Dennis Ludwina
537	Red Baron'	(M. acuminata x M. 'Big Dude') Flowers are smaller than M. 'Big Dude', but with a deeper red color. This magnolia is much hardier than M. 'Big Dude'. Excellent seed fertility. Zone 5 From Dennis Ludwina
538	Roseanne'	(liliiflora 'O'Neill' x m. kobus var. kobus 'Norman Gould') This hybrid has six or seven tepals which are a rich lavender pink on the outside and a lighter pink on the inside. The tepals are very broad and retain their upright form. A fertile hybrid that easily sets viable seed. The foliage is semi-glossy with a rugose texture. Excellent seed fertility. Zone 4 From Dennis Ludwina

539 x soulangiana	Alba Superba	
540 x soulangiana		Saucer Magnolia. Good large tepaled pink clone. AGM
541 x soulangiana	Alba	A white form of x soulangiana with tulip-shaped milky-white flowers, with faint pink tinge at base of tepals. More vigorous than x soulangiana. AGM. Flower larger, 9 petals, dark purplish pink and white on the inside of the petals. Saucer-shaped when fully open. Blooms two weeks later than x soulangiana.
542 x soulangiana	Alexandrina	An attractive variety with large white fragrant flowers with concealed rosy-purple flush near the base. Upright bushy habit.
543 x soulangiana	Amabilis	
544 x soulangiana	Amabilis x Mark Jury	
545 x soulangiana	Big Pink	Very fine, late blooming, with bowl shaped flowers that are rich pink outside and white within.
546 x soulangiana	Brozzoni	A late variety with pure white flowers flushed lavender at the tepal bases. AGM, FCC.
547 x soulangiana	Burgundy	Deep pink flowers which fade to almost lavender pink. Unique colour. Weather-resistant flowers.
548 x soulangiana	Coates	Very beautiful, many deep lavender saucer-like flowers, fast growing, early blooming.
549 x soulangiana	Dorsopurpurea	Attractive purple-pink flowers. (Shinbanishi, Japan)
550	Eleanor May	
551 x soulangiana	Grace McDade	Huge well-formed lavender-pink flowers with broad tepals.
552 x soulangiana	Lennei Alba	Large pure ivory-white globular shaped flowers. AGM.
553 x soulangiana	Lennei Alba x Veitchii	
554 x soulangiana	Norbertii	(campbellii var mollicomata Lanarth x soulangiana) Deep reddish-purple buds open to clear red-purple bowl-shaped blooms which slowly fade to silvery purple. Upright vigorous habit. Blooms after 5-7 years.
555 x soulangiana	Rustica Rubra	
556 x soulangiana	Rustica Rubra x Iolanthe	
557 x soulangiana	San Jose	Large cream flowers shaded pastel rose pink, deeper at the base. AM.
558 x soulangiana	Speciosa	Many beautiful pure white flowers. Late blooming. A dwarf habit and reduced flower size. The goblet-shaped blooms are not as dark as in Lennei but the colour is very even from the base to the tepal margin. Tepals are slightly pointed and pure white inside. Lightly fragrant.
559 x soulangiana	Sweet Simplicity	Rose-red with white inside.
560 x soulangiana	Triumphans	pink, white inside, late blooming.
561 x soulangiana	Verbanica	Large loose growth with large nicely formed deep red-purple flowers. Late. AGM, FCC.
562 x soulangiana	Lennei	
563 x soulangiana	Alexandrina Gulf Coast form	
564	Lombardy Rose	(Kehr)
565	Lilliputian	(Semmes, Alabama) Smallest of x soulangiana cultivars. Late flowering with an abundance of small, light pink flowers. Very hardy, outstanding coral pink flowers with up to 16 tepals, with first-class fragrance. Tree requires several years of growth to bloom floriferously. Fair seed fertility. Zone 4
566	Pink Royalty'	From Dennis Ludwina (M. 'Yellow Bird' x M. 'Caerhays Belle') Flowers similar to M. 'Caerhays Belle', but much hardier. The deep pink exterior and lighter pink interior shows no traces of yellow. The tree bloomed after 20 degrees below. No seed fertility. Zone 5
567	Blushing Belle'	From Dennis Ludwina
568	Coral Reef'	This magnolia with gorgeous, coral pink flowers, has been a rather scanty bloomer thus far. Excellent hardiness. Good seed fertility. Zone 5 From Dennis Ludwina
569	Angelica'	(m. cylindrica x m. soulangiana 'Sawada's Pink') Angelica has nine round, cup shaped tepals that measure over 3 inches in diameter. The color is a pure white. The flower retains its bowl shape and does not flop with age. Angelica will develop into a medium sized tree. The bloom time is intermediate between m. cylindrica and m. soulangiana. The seed of this hybrid was collected from the original cross made by Phil Savage. Good seed fertility. Zone 5 From Dennis Ludwina

570	Golden Rain'	This tetraploid cross of <i>m. acuminata</i> x <i>M. 'Norman Gould'</i> has medium yellow flowers with six, very wide, cupped shaped tepals, that cascade downward. This vigorous, tall growing magnolia has shown tremendous hardiness. Good seed fertility. Zone 4 From Dennis Ludwina
571	Champaign'	A <i>loebneri</i> selection made by Joe McDaniel at the University of Illinois From Dennis Ludwina
572	Crescendo'	is a seedling of 'Yellow Lantern' with it's pollen parent suspected to be 'Big Dude' From Dennis Ludwina
573	Spectrum	(<i>liliflora Nigra</i> x <i>sprengeri Diva</i>) Large fine reddish-pink, flowers young, fast grower. From Dennis Ludwina
574	<i>campbellii</i> x <i>liliflora</i>	(<i>campbellii</i> x <i>liliflora</i>) (Blumhardt, NZ). Large red pink flowers, <i>campbellii</i> type, growth fast, flowers young, Long flowering period.
575	Susanna van Veen	Large furry decorative buds in winter-time. Flowers large brilliant rose-red, without purple shading. Early. A darker <i>Caerhays Belle</i> .
576	x <i>thompsoniana</i>	Fragrant creamy-white flowers. Blooms in summer.
577	x <i>thompsoniana</i>	Fragrant creamy-white flowers. Probably hardier than <i>Thompsoniana</i> .
578	Bloomfield x <i>Hypoleuca</i>	(<i>hypoleuca</i> Bloomfielt x <i>tripetala</i> Wada).
579	<i>tripetala</i> x <i>macrophylla</i>	
580	<i>tripetala</i> x <i>wiesneri</i>	(<i>campbellii</i> x <i>denudata</i>) Dark green leaves that are tinted purple while young and very large, white flowers (having a pink tinge at the base) produced in abundance before the leaves emerge in the spring.
581	x <i>veitchii</i>	Satiny white flushed pink, wind tender.
582	x <i>veitchii</i>	(Clarke`s var.)
583	x <i>soulangiana</i>	Nice tall pink flowers. FCC.
584	x <i>veitchii</i>	Elegant nicely shaped pure light pink flowers.
585	x <i>veitchii</i>	
586	x <i>veitchii</i>	(<i>campbellii</i> var. <i>mollicomata</i> Lanarth x <i>liliflora</i> hybrid) This is possibly the finest Jury hybrid to date, with its large 25 cm wide heavy flesh-textured rounded blooms of great substance and rich ruby red colouring. Flowers appear early in the season from late winter. Tree habit is erect, open- branched and narrowly rounded at maturity growing to 6 m. New Zealand.
587	Vulcan	(<i>hypoleuca</i> x <i>sieboldii</i>) AM. Very powerful fragrance, blooms over a long period. Saucer-shaped creamy-white flowers with prominent rosy-crimson anthers. A large shrub or small rounded tree.
588	x <i>wiesnerii</i>	(<i>hypoleuca</i> x (<i>x</i> <i>wiesneri</i>)). Sir Peter Smithers. Strong grower, large tree; flowers like <i>hypoleuca</i> , but scented.
589	x <i>wiesnerii</i>	(<i>hypoleuca</i> x (<i>x</i> <i>wiesneri</i>)). (Eisenhut)
590	x <i>wiesnerii</i>	Leathery green leaves and heavily scented multi-tepalled white flowers. Elegant tree. Tender.
591	<i>doltsopa</i>	
592	<i>doltsopa</i>	Flowers at a very early age. A small to medium-sized tree. Very fragrant white flowers which are generally produced in great profusion.
593	<i>doltsopa</i>	(<i>Villa Carlotta</i>) Very fragrant, creamy-yellow flowers edged purple. Blooms from early spring into summer.
594	<i>figo</i>	(<i>Michelia dotsopa</i> x <i>Michelia figo</i>) large, evergreen shrubs or small trees with dark green-black leaves and many attractive, fragrant, whitsh flowers.
595	<i>foggii</i>	Large handsome white flowers and heavy foliage. A strong and delightful fragrance. Flowers when small.
596	<i>foggii</i>	Medium to large white flowers bordered purple-pink.
597	<i>foggii</i>	Fragrant. Flowers when small.
598	<i>maudiae</i>	Many large fragrant cup-shaped white flowers. A large evergreen tree with thick leathery glossy dark glabrous leaves.
599	<i>maudiae</i>	
600	<i>campbellii</i>	<i>campbellii</i> seedling
